

## **ETDPA SCHOOL PROJECT STARTED AT KEKEBESTIBAH SECONDARY SCHOOL – MAY 23/2024**

In 2024, the Ethiopian Training and Development Professionals Association (ETDPA) is launching a new initiative. The aim of this project is to equip students with essential life skills and prepare them for their high school examinations. Additionally, the association is advocating for Technical and Vocational Training as a viable option for the students' future. Our program will kick off at Kokebstibah Secondary School in Addis Ababa. The opening address will be delivered by Mesganaw Getinet, the president of ETDPA.

Konjit Belay, Mekonene Yazachew, Abebaw Lemma, Biruk Workneh, Wassihun Gebre, and Daniel G/Mariam actively contributed their expertise during the training session, sharing their valuable insights and experiences on the discussed topics.

The training witnessed enthusiastic participation from the students, who eagerly attended the session. Every participant dutifully signed the attendance sheet. We requested the trainees to actively engage in the school project telegram group, while also encouraging the volunteers to share the knowledge gained from the training with their classmates.

Following today's session, all volunteers will assess the trainers, methodologies, and the participation of trainees. This evaluation is crucial for the current school's improvement and the future training delivery methods of ETDPA's school, as well as for planning tomorrow's session and the commencement of training at Wondrad Secondary School over the weekend.

Totally 41 high school students were attended the session.
